

Hypodermic Needle Fact Sheet

Terumo's SurGuard™3 safety hypodermic needle offers three modes of activation and a wide range of benefits. See how SG3 is combining safety, ease of use and simple standardization to make everyone comfortable.

EASE OF USE

- Versatile, intuitive safety mechanism that mimics 75-80% of safety hypo market*

COMPLIANCE

- One intuitive device can support adherence to internal standards*

SAFETY

- New and improved hub and needle lock to help clinicians with naked sharps
- Safety mechanism minimizes ability to override

IMPROVED CLINICAL OUTCOMES

- T-Sharp™ Technology may reduce injection pain*

UNIVERSAL COLOR CODING GAUGE SIZE

Some of these sizes may not be available in all regions.

VERSATILITY

Most syringes can be activated two ways but **SurGuard™3** has

3

Thumb, finger or hard surface

SurGuard™3 needle's double-bevel design allows the needle to penetrate skin with less force, which could mean **greater comfort to patients***.

SurGuard™3
SAFETY HYPODERMIC NEEDLE

62.2%
of needlestick injuries
are due to discarded unprotected sharps*
